

infinias® PROFESSIONAL

infinias PROFESSIONAL provides all of the essentials needed to deliver broad access control capabilities to conveniently secure and manage your location, within a simple, intuitive browser-based user interface. The software allows you to view events and associated playback video, as well as run reports on any or all events and alarms. Define multiple security roles, access and privileges for individual users, and the powerful 'rules engine' to perform variety of functions including: defining schedules and holiday sets, sending push notifications to Site Access mobile app users, and designing, building and printing badges with Microsoft Report Builder 3.0.

Key Features & Benefits

- **Responsive Design User Interface:** Software auto-adjusts to the size of the browser window, simplifying interaction with the software on any device type.
- **Push Notifications:** Utilize the Rules Engine and the Site Access mobile app to send exception based notifications to a group of people.
- **3xLOGIC Video Integration:** View live video for a door or playback video for a specific event using infinias Professional software or 3xLOGIC Site Access mobile app.
- **MileStone XProtect® Video Integration:** Utilize infinias access control management with the Milestone XProtect Smart Client for dedicated functions such as lock, unlock, momentary unlock, and to view access control events, including person and card information.
- **Customizable Rules Engine:** In addition to common access control features, infinias' powerful rules engine allows you to build your own. Define events, advanced filters, and actions to create an unlimited set of custom features that deliver the results required for your application. With infinias, the power is in your hands.
- **People & Groups:** Easy management. Manage people, groups, roles, privileges, and credentials from a single screen.
- **Door Status:** Improve monitoring. Status icons provide improved door status monitoring. Hover over an image in the legend to bring up a tool tip that explains the icon.
- **Auto Discovery:** Simplify configuration. Auto discovery of door controllers makes configuration easy. Any additional doors added to the system at a later date can benefit from auto discovery as well.
- **Badges & Reports:** Run reports and create badges. infinias PROFESSIONAL uses Microsoft's SQL Server Reporting Services to host badges and reports. Many IT groups already use this solution internally and have their own SQL expertise.
- **LDAP Integration:** Real-time LDAP updates at the door. This feature provides Active Directory integration and synchronization for easy access control administrative management and real-time LDAP updates at the door.
- **Calendar Integration:** Seamless calendar integration for easy scheduling. The calendar integration feature provides seamless integration with Google Calendar, Microsoft Outlook, and Exchange for easy schedule management. You can manage ad hoc lock and unlock schedules for any zone automatically without ever having to log into infinias PROFESSIONAL.
