

## Multi-Site Gas Station Surveillance Solutions

### Customer service and security... **Guaranteed!**

Gas stations are all too familiar sites for criminal activity, and where theft has become a widespread problem and an on-going concern. Gas station's convenience stores are faced with the challenge of protecting their business, their customers, and their employees.

3xLOGIC's advanced video surveillance solutions are exclusively designed for scalable, multi-user and multi-site gas station locations. 3xLOGIC's line of IP and Hybrid video management solutions help gas station owners manage a multitude of security operations – in real time.

We proudly support Petro-Canada at 1800 locations, Imperial Oil (Esso) at 1000 locations, and Shell Canada and Chevron Canada, where 3xLOGIC is the "solution of choice" for all CCTV equipment. 3xLOGIC customers rely on our surveillance systems to securely and reliably connect their branch gas stations and convenience stores to their corporate headquarters and transaction processors, helping them speed millions of customers on their way.

Fully integrated site management tools, sophisticated video analysis, and other datasets, including 2-way audio, POS, ATM, and facility data, are at the heart of every 3xLOGIC surveillance system.

Profit from an intelligent system: reduce the number of cameras by using mega-pixel cameras, benefit from simple installation and deployment, built-in motion detection and alarm management, monitor and record video over an IP (Internet Protocol) networks, and easily recognize license plate numbers with the system's unmatched video quality. At 3xLOGIC, we understand your business needs. From comprehensive customer service at the pump or at the counter, to behind the scenes security - credit and debit card authorizations and tank-level monitoring - **3xLOGIC secures your business, your customers, and your employees – guaranteed!**

"At Shell, we put our customers' safety and security first. With 3xLOGIC's CCTV systems in place at our branch locations nationwide, we know our stations are guaranteed smooth running, safe, and secure business - 24 hours a day."

**Tim Edwards, Advisor,  
Retail Engineering Services,  
Shell Canada**

### **Benefits**

- *Speed Up Transactions – increase speed and reliability for cashless transactions, reduce transaction processing fees and replace multiple dial-up lines*
- *AZTECH Video Compression Technology – results in savings of up to 90% in video footage when compared to standard mega-pixel cameras*
- *Manage Inventory Loss – reduce shrinkage and improve overall operational efficiency*
- *Increase Sales – faster transactions and improved information sharing between branches and headquarters*

## Multi-Site Gas Station Surveillance Solutions

### Behind the Scenes

Gas stations and their convenience stores are prime locations for video surveillance. A video surveillance system can help protect your station against theft, loss prevention, vandalism, and other damages.

- Easy to install – Surveillance systems using IP cameras are easy to install. Unlike CCTV systems, you simply mount the cameras and cable them with IP network infrastructure - no power tools or coaxial cable required.
- Prevents theft – A prominently displayed security camera near your register can prevent theft and help you quickly identify license plates and car models.
- 3xLOGIC's Remote Monitoring – Broadcasting your camera footage over the Internet makes it easy to monitor multiple locations at any time.
- Improved images – Security cameras and efficient security systems help reassure customers that your gas station is safe.

### Promise of Profitability

Market-proven, 3xLOGIC's gas station surveillance solutions help reduce shrinkage, manage liability and losses, and ultimately, increase sales and operational efficiency. Our systems automatically assist in detecting theft, fraud and error, coupled with quick and efficient investigations.

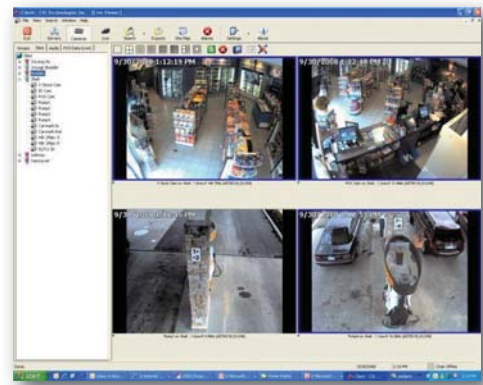

- Comprehensive video analytics – prevents real-time security breaches
- Innovative hybrid video solution – ensures use of existing legacy video equipment
- Manages multiple sites and employees using built-in video and 2-way audio
- Monitors and assesses employee performance and adherence to policy and procedures
- Significantly reduces site-to-site travel
- Provides interactive on-the-job-training
- Measures customer traffic flow and patterns
