

VIGIL DVR Installation Guide for Wall Mount Chassis

To install a wall mount chassis, perform the following steps:

1. Open the lid on the unit by using the provided key.
2. Remove the two inner housing screws (2, located at top corners) and remove inner housing.
3. Determine the mounting location of the unit. Refer to Figure 1. Drill holes in the mounting surface using the unit as a template. There are two upper and two lower mounting points on the wall mount chassis
4. Attach the unit securely with four fasteners (not supplied) of the appropriate length. Utilize washers or an appropriately large headed fastener.
5. You can use fasteners up to 0.70 cm in diameter.
