FACILITIES IS OUR
TOP PRIORITY.**

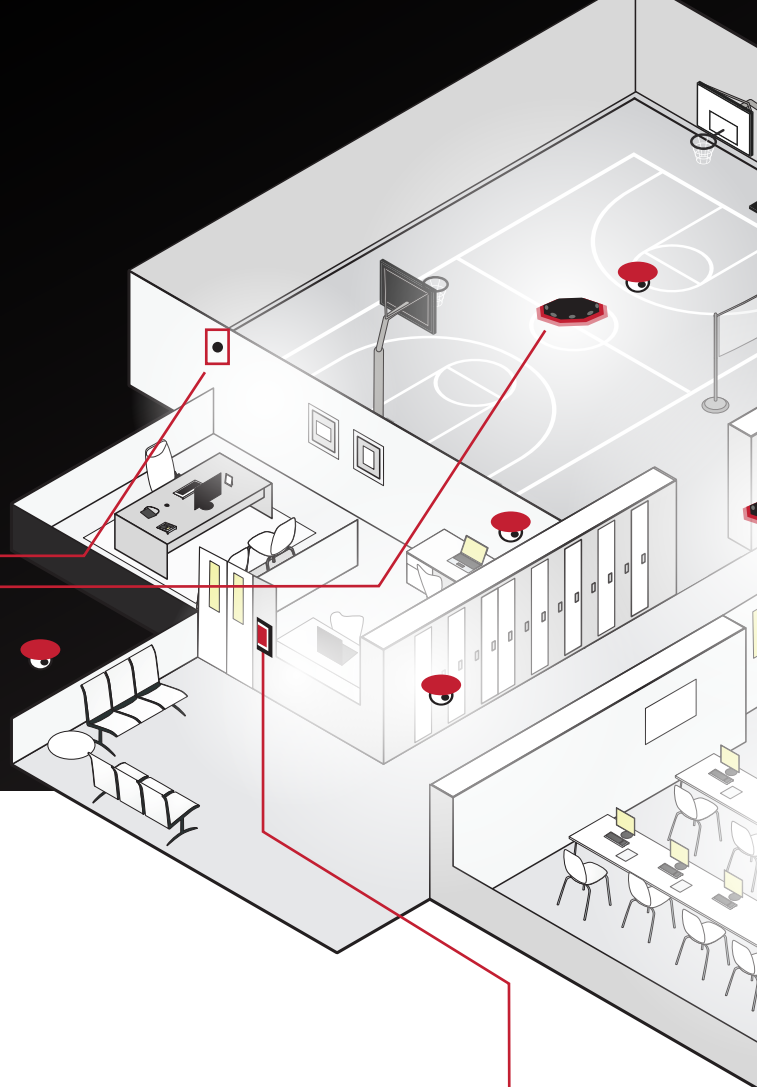

Gunshot Detection Solutions

3xLOGIC's award-winning Gunshot Detection solution can be an important part of your active shooter safety and security plan. Gunshot Detection uses concussive force recognition technology, which detects the force you feel if you were near a gunshot.

The solution not only seamlessly integrates into our solutions, but also into your existing intrusion, video management or access control solution to better prepare your security team to react quickly and effectively in an active shooter situation.

- » Two options available, 8 sensor for larger spaces and a single sensor, available in metal and plastic options for small to medium spaces
- » Sensors alert when an event happens
- » Patented technology with a more reliable solution compared to traditional microphone based technology
- » Affordable solution with large detection area
- » Easy installation
- » Can be installed indoor and outdoors

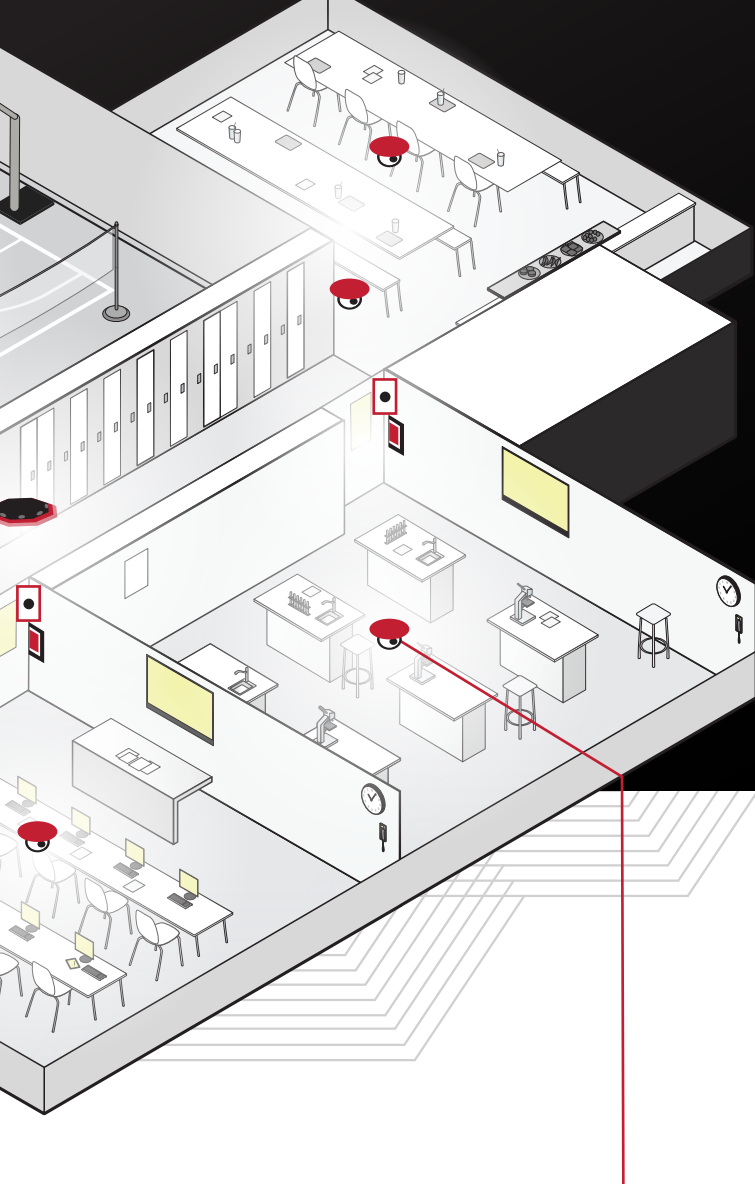

infinias™ Access Control Solutions

Cost-effective hardware and software that helps you control access points throughout your facility - schedule safety procedures from your calendar and react to events faster with instant push notifications.

- » Gunshot Detection sensors allow you to take action to events faster
- » Ideal for any location
- » Eliminates the need for building key

VIGIL™ **Video Management** **Systems (VMS)**

Offering invaluable insights into your security, our state-of-the-art cameras and intelligent software allow you to record and stream feeds in real time via cloud or on-site servers - going beyond simply viewing and recording by helping you to identify potential threats.

- » Gunshot Detection sensors alert action (video recording)
- » Cost-effective
- » Scalable
- » Simple to install, service and manage
