

The following is a list of added features and issues fixed in the VIGIL Video Management System software suite between VIGIL v12.60.0100 (September 2023) and the new release of VIGIL v12.60.0200 (December 2023). Each VIGIL product will be listed with its fixed issues and added features contained beneath it in the table. Please contact [3xLOGIC Engineering Support](#) if you have any questions or concerns.

Column Explanation:

- **Ticket #.** – The listed issue’s reference number
- **Issue/Enhancement** – Description of the issue/enhancement

VIGIL Server – Includes VSMU, VIGIL Video Verification, VIGIL Media Server, VPOS, CLOUD NVR Plugin, Database Utilities

Ticket #.	Issue/Enhancement
Added Features	
71746	Updated "Remote Web Browser" to use MS Edge as the backend for broader Chromium based camera support
71333	Added support for regional POS currency symbols (GBP, Euro, Kroner)
70406	Added support for local/remote PoE power cycling for new 1U Windows-based NVR
Issues Fixed	
71447	Fixed issue where closing the underlying Network Camera settings form before the "reboot camera" dialog window opens triggers a crash
71253	Fixed issue where disabling Client as main UI while in Kiosk Mode will require a manual reboot if you close Client
71224	Fixed issue where the POS Priority Camera form will crash if you delete an entry then add one without saving the delete first
71023	Fixed issue where the "Reset All Camera Settings" button is not clearing analytics rules associated with that Channel
71020	Fixed issue where local VSMU was not able to login with AD credentials under certain network conditions
70734	Fixed issue where the database manager’s “Reset VIGIL Server” button is not resetting all defaults as expected.
70700	Fixed issue where an invalid entry date in registry causes VSMU to not load settings
70670	Fixed issue where the Scheduled Still Shots form is not showing emails being disabled on master list
70578	Fixed issue where Onboard Analytics configured from a camera can persist after that channel/camera is disabled
70568	Fixed issue where usernames with apostrophe's fail to be recognized in the Database Utility and Settings Utility
70496	Fixed issue where a user cannot put a space in the username field under Network Camera Settings until after you have the whole username typed out
69730	Fixed issue where “Onboard Analytics” may try to communicate to a camera with the wrong camera type
69697	Fixed issue where VIGIL Server will send out emails with the "VIGIL Server Can Send Email Notification" disabled in certain areas
69564	Fixed issue where the analog multiplexer output does not auto-start on boot

69121	Fixed issue where the analog multiplexer output not working correctly on some HD capture cards
69120	Fixed issue with the analog multiplexer output not working correctly on some HV capture cards
69087	Fixed issue where the Device Service may detect VISIX Gen3 cameras as ONVIF type
67337	Fixed issue where Relays and alarms Email notifications and other settings forms do not save the form if you leave the recipients blank
67256	Fixed issue with remote settings updates in quick succession over relay connections failing
67177	Fixed issue where any email recipients box left blank causes the forms to not function properly

VIGIL Client

Ticket #. **Issue/Enhancement**

Added Features

71748	Added support for cancellation of loading of Live or Playback video
70133	Changed default behavior to display Camera title bar on live and playback video
69997	Improved UI performance when loaded with enterprise-volume server lists.
69555	Removed 36 Channel hard cap on live video. New default of 64 live channels.
69554	Added UI element to enable multi-instance

Issues Fixed

71693	Fixed issue where Camera scroll-to-zoom not working on some multi-monitor layouts
71655	Fixed issue where Shift Analysis VPOS Event Flags with pure red does not show on the entry
71455	Fixed issue where user names with apostrophes cause issues with Restrict / Lock footage
70734	Reset VIGIL Server is not resetting everything back to default
70671	Fixed issue where POS Data form on playback can become cluttered after moving column order and moving horizontal scroll bar
69090	Fixed issue where an unhandled exception occurs when opening "Switch" for Client Monitor Output
68955	Fixed issue where Client will crash if a Windows restart is triggered while a dewarped camera playback is visible

VIGIL Central Management (VCM)

Ticket #. **Issue/Enhancement**
