VISIX™ 3MP IP Outdoor Dome Camera

This three (3) megapixel IP camera from 3xLOGIC provides high-definition video at a full 2048 x 1536 pixels for outdoor video surveillance applications requiring superior clarity and detail. It is ideal for locations such as schools, government, hotels, banks, museums and supermarkets.

This high-definition camera is packed with all the features you might need for nearly any application including: Motorized lens, intrusion detection; weather and impact protection; SD/SDHC/SDXC card slot for local recording; motion detection; lowlight day/night functionality; and compatibility with a wide variety of standardized network protocols.

The convenient and aesthetically pleasing dome camera format allows unobtrusive and easy installation in a wide variety of areas. In addition, this camera is designed to continue functioning at top performance at temperatures as low as -30°C (-22°F) and as high as 60°C (140°F) allowing a wide range of applications.

It comes standard with a 2.8-12mm vari-focal lens providing support for most applications. Day / Night operation allows use in varying lighting conditions down to 0.1 lux without the need for electronic gain providing better night time video.

Dual streaming permits recording at the highest quality while allowing fast live viewing from anywhere in the world regardless of available bandwidth. In addition, with full support for both variable bit rate and variable frame rate, the quality of each stream can be matched to available bandwidth for the most effective video quality possible.

When coupled with the VIGIL Series of digital video recorders and Video Management System (VMS) software from 3xLOGIC, superior point-to-point hardware compression and decompression allows for maximum performance of streamed live video providing better video quality, more concurrent streams and a lower overall hit to CPU performance.
