

## Dayton Church Catches the Bad Guys with Verified Video Surveillance from Sonitrol and 3xLOGIC

**3xLOGIC**  
VIDEO MANAGEMENT | **VIGIL**

### THE SITUATION

Bold Believers Church of Christ, also known as Northwest Church of Christ, is a growing congregation of 250 members with various ministries eagerly serving the Lord.

### THE CHALLENGE

The Church is located in a tough neighborhood, with a large homeless population, and because it is such a sprawling facility, staff felt they needed a robust security system to protect their assets. During recent renovations, a door was accidentally left unlocked, providing an opportunity for someone to break in.

### THE SOLUTION

3xLOGIC and Sonitrol SW Ohio implemented industry-leading video and audio verification technology, which provides police responders with real-time situational updates when dispatched to the church. Church of Christ has installed 3xLOGIC Multi-Sensor devices connected to the Sonitrol Central Station to provide an active, visible deterrent to break-ins.

### THE BENEFITS

- Immediately upon entering the church, the perpetrator was detected by the Multi-Sensor devices and the Sonitrol Operator was able to verify the intrusion within seconds using motion, video, and audio sensors.

- Upon alarm confirmation, the Sonitrol operator immediately contacted the dispatcher for local law enforcement.
- The church is a large building with many entrances, and the Sonitrol Operator provided a steady stream of information updates to ensure real-time coordination with the law enforcement officers on the scene.
- The Operator was able to guide the police to the suspect's exact location, give a description of the suspect, and facilitate an apprehension before there was any damage or loss of assets.
- In addition to the Multi-Sensor devices, the church has a number of 3xLOGIC outdoor cameras tied to a VIGIL NVR.
- Watch the video and listen in on a real-time apprehension: <https://youtu.be/rmUUS-B8tH4>

*"This was a great success story. The church was quite pleased with this apprehension because it sends a clear message to the neighborhood: don't mess around, you're going to get caught!"*

*—Alison Shiver, Marketing Manager, Sonitrol SW Ohio*

## THE PRODUCTS

3xLOGIC Recording Appliances powered by the VIGIL Video Management System (VMS) Suite of Products, are a distinct combination of hardware and software that were collectively engineered to maximize performance and functionality.

The 3MP IP Outdoor Dome camera provides high-definition video at a full 2048 x 1536 pixels for outdoor video surveillance applications requiring superior clarity and detail. It is ideal for locations such as schools, government, hotels, banks, museums and supermarkets.

The 3xLOGIC Indoor Multi-Sensor NVR is a cube style, 2MP camera that goes far beyond being an IP video camera. The Multi-Sensor boasts the ability to host VIGIL Server, allowing the camera to record video to the onboard SD card, with full search capabilities in VIGIL Client and in the View Lite II and infinias mobile apps. Additionally, use VIGIL Central Management (VCM) to monitor online/offline and recording status as well as number of days of recorded footage. A true all-in-one solution, built-in Passive Infrared (PIR) sensors, 2-way audio with VIGIL Server, and digital I/O allow the Multi-Sensor to be an alarm annunciator, audio system, and video recorder in one, small unit.
