

The following is a comprehensive list of release note for the infinias™ eIDC32 firmware v3.9 (released August 2020). Please contact [3xLOGIC Support](#) if you have any questions or concerns.

Column Explanation:

- **Added Feature** – A listing of the new feature /enhancement with supplemental details where applicable.
- **Issues Fixed** – A listing of a bug fixes with supplemental details where applicable.

eIDC32 Firmware v3.9

Issue/Enhancement	Description
Added Features	
▪ Support for NCD Relay Boards	Added Support for NCD Relay Boards
▪ Local Elevator Control	Added support for Local Elevator Control
▪ First In	This feature allows a door to be secured until an employee arrives, regardless of the door's schedule. This ensures that a business won't automatically unlock according to a pre-defined schedule if no employees are present (for example, if an opening manager is running late).
▪ Double Tap	This feature allows a user to lock a door by double-tapping their credential on a reader.
▪ Provide Firmware Capability Flag	This reports to infinias server software whether the customer's branch of firmware was built for Elevator Control.
Issues Fixed	
▪ Remedied Vulnerabilities, including a change to the eIDC32's validation of the cloud server certificate.	
▪ Various bug fixes and performance improvements
