

## VISIX 2MP Indoor Dome Low Light Camera with 2.8 - 12mm Remote Focus Lens, IR, True WDR, and HDMI Output

The VX-2M-ID-RIAW is 2 MP indoor dome camera with built-in IR, a vari-focal lens, HDMI output, and H.265 compression, resulting in less stress on your network. Additionally, the VX-2M-ID-RIAW supports 2 video streams. This allows you to record a high-resolution, high-framerate stream, while using the alternate stream in lower resolution for live viewing, further cutting down pressure on your network.

Fully integrated into the entire VIGIL Software Suite, including VIGIL Client and View Lite II mobile apps, you can use the in and out audio lines for bidirectional communication as well use of the alarm input and output. This allows users to remotely receive notifications of alarms, trigger a relay, and both talk and listen to their site from anywhere in the world.
